INTRODUCTION

Computer Science student (3rd year) with strong skills in C++, Java, and JavaScript, and hands-on experience in MERN stack development (MongoDB, Express.js, React, Next.js/Node.js). Passionate about building responsive, scalable applications and eager to contribute to dynamic tech environments.

EDUCATION

SHRI VAISHNAV VIDYAPEETH VISHWAVIDYALAYA

Bachelor of Technology (B.Tech)
Computer Science and Engineering (CSE)
Cumulative GPA: 8.00/10

Indore(M.P), India
2023 - Present

WORK EXPERIENCE

MLOCK INNOVATIONS

Full-Stack Web Developer Intern

Indore(M.P), India
Nov 2025 – Present

- Designed and launched a responsive **frontend interface** with modern frameworks, delivering a clean and consistent user experience across devices.
- Designed and optimized **backend systems** to ensure secure data handling, scalable functionality, and high performance.
- Configured and maintained the **hosting environment** to deliver a reliable, high-speed website with consistent uptime.
- Implemented effective **SEO** strategies including sitemap optimization, indexing, and schema markup that boosted the Mlock website to **top positions on Google search results**.

PROJECTS

GET ME A CHAI | Crowdfunding Platform

link: get-me-a-chai-3f7g.vercel.app

- Developed and deployed** a full-stack crowdfunding platform using **Next.js** and **Vercel**, enabling creators to monetize their work through community support.
- Implemented responsive UI/UX** with modern design principles, enhancing engagement and accessibility across devices.
- Integrated Razorpay payment gateway** for secure, real-time transactions, ensuring seamless user experience and compliance with industry standards.
- Implemented secure authentication with NextAuth.js and architected a scalable MongoDB Atlas database using Mongoose**, delivering seamless login, robust session/OAuth/JWT support, and optimized queries to handle thousands of users efficiently

PassOP | Password Manager

Source code: github.com/PrakharParihar29/Password-Manager

- Developed a **Password Manager** app using **React**, with seamless UI and smooth animations
- Implemented **local storage** for quick client-side data retrieval and testing
- Integrated **MongoDB** as the backend database for secure and persistent password management
- Used **Express.js** with **Node.js** to handle API requests and connect to the database

SKILLS

- Programming Languages:** C++, Java, JavaScript
- Frameworks/Libraries:** React, Next.js, Tailwind CSS
- Backend/Tools:** Node.js, Express.js, MongoDB, GitHub

Soft Skills: Collaboration, Time Management, Problem-Solving, Attention to Detail.
